OWN, CREATE, PLAY AND EARN

The VUCOWORLD creators are building a prestigious virtual world where players can build, own, and monetize their virtual experiences using VUCO, the main utility token of VUCOWORLD.

VUCOWORLD Metaverse is designed as a virtual world that allows users to carry out real-life tasks. Here, they'll be able to work, have fun, shop, exercise, socialize, and create their own lifestyle. What's more interesting is that they can also set up their own businesses, buy land, make art, and go to concerts – all in a virtual environment.

VUCO
W O R L D

EXECUTIVE SUMMARY

VUCOWORLD aims to innovate and create a lifestyle within a metaverse. It visions a future of you, rather than buying clothes for your closet, you might buy clothes for your avatar online, making it forever young and flawless. Also, rather than buying a piece of art to hang on your wall, you might buy a piece of NFT digital art to display in a virtual gallery, which has the potential to generate income in the future.

Cryptocurrencies will be the main form of exchange in the metaverse. VUCOWORLD's native token, the **VUCO Coin** will serve as the main exchange for goods and services. So when you visit VUCOWORLD, you will need VUCO Coin if you want to buy anything. Of course, every virtual economy needs money. Cryptocurrencies work like virtual cash in virtual worlds. Transactions are almost instantaneous and the blockchain technology behind them is designed to build trust and ensure security. VUCO Coin will be traded on Cryptocaptrades and holders of this coin can use it to buy land in VUCOWORLD Metaverse. No other coins will be accepted until we create the Digital land 1155 NFT smart contract on Opensea. Once the VUCOWorld NFT 1155 deeds are created, the buyer can sell the property or wait for offers.

VUCO
W O R L D

NFTs

There's another aspect of blockchain and cryptocurrency that's key to metaverses: Non-Fungible Tokens (NFTs).
NFTs can be pieces of art, sports trading cards, in-game items, and much more. They are essentially unique digital items, where the ownership and other information is coded into the token.
NFTs are transforming the gaming industry because they allow people to own and profit from the items they earn or build in the game — and carry those profits or items into real life. Before, if you participated in a game like Axie Infinity (AXS), the rewards you built up would only have value in that game. Now, Axie players earn rewards in cryptocurrency that have value outside the game.
It's that idea of ownership that makes NFTs so important for virtual worlds. NFTs means people can buy and own land in the metaverse. People can buy and create NFT avatars to move around in virtual worlds. They can also create and sell items for their avatars — like the digital clothes we mentioned earlier.

COMPARISON OF FUNGIBLE VS NON-FUNGIBLE TOKEN

FUNGIBLE	NON FUNGIBLE
EXAMPLE, 1 US DOLLAR	EXAMPLE, 2003-04 LeBron James Exquisite Collection Rookie Parallel Card #78
INTERCHANGABLE	NOT INTERCHANGEABLE
UNIFORM (ALL ARE THE SAME)	DISTINCT OR UNIQUE
DIVISIBLE	INDIVISABLE

Through the use of NFTs, VUCOWORLD users will be able to benefit from:

- DIGITAL OWNERSHIP: Users of VUCOWORLD are the true and perpetual owners of their digital items, even if the world became obsolete. With blockchain, every virtual world item can be tokenized, allowing users to decide how they want to trade, sell or gift their items.
- SECURITY AND IMMUTABILITY: All Virtual world items can be easily tokenized and traded in the primary and secondary markets that are managed and facilitated by BLOCKCHAIN TECHNOLOGY. Fraud and theft are minimized on the blockchain because it is distributed ledger.
- TRADING: Blockchain-based platforms can provide users with ultimate control over their digital assets. They can buy and sell items freely without concern of being taken advantage of or be worried about the platform closing down and losing all value of their virtual world items.
- CROSS APPLICATION INTEROPERABILITY: Blockchain provides the capacity for virtual worlds to utilize shared ASSETS. ASSETS, AVATARS, LAND can be used in other worlds that allow it. This means the virtual world items are no longer confined by a narrow digital ecosystem.

VUCO
WORLD

Vuco World White Paper

VUCOWORLD metaverse uses several tokens to create a circular economy between all the profiles of users who will interact with its platform, creators and land owners. VUCO COIN is a token based on the ERC20 protocol, these tokens act as the official currency in the ecosystem when purchasing goods and services within the platform marketplace.

WHAT ARE VUCO TOKENS AND WHAT ARE THEY USED FOR?

VUCO token is the native currency of VUCOWORLD AND essential part of the virtual world. It is a cryptocurrency (ERC 20) token paired with ETHEREUM, currently the 2nd largest most traded crypto currency on the market today, and 2nd largest market cap of over $500 billion USD. These tokens can be used to buy AVATARS, WERABLES, LAND, REAL ESTATE, BILLBOARDS and many more within the marketplace.

VUCO is a governance token that allows holders to participate in governance decisions of the platform, using a DAO structure.

VUCO				
PURCHASE	TRADE	PLAY	CREATE	GOVERNANCE
SERVICES	LAND	GAMES	BUILDINGS	VOTES
	BILLBOARDS		AVATARS	STAKING
	REAL ESTATE		BUSINESSES	
	ASSETS		GAMES	

VUCOWORLD PLATFORM

The VUCOWORLD team's mission is to build a system where users will be able to buy, create, share, sale and trade without central control, enjoying secure copyright ownership with the ability to earn VUCO.

There are currently over 500 million creation games and 160 million monthly active users on the market today, but the current problem with all of these creation gaming platforms are:

- The centralization of user-generated content, limits the creator rights and ownership
- Central control over the trading of virtual goods created by the users, restricts users from generating fair value for their creations, limiting what they can or cannot sell, and taking a significant portion of the sales revenue.

VUCO
WORLD

Vuco World White Paper

- VOXEL art, which can be difficult to prove creative ownership of works, especially as content is copied, altered, and built upon.
- Existing game marketplaces are based upon FIAT CURRENCIES, which do not support true microtransactions and are vulnerable to credit card fraud that can unbalance in virtual world economies.

LAND AND LAND MAPS

Each land parcel purchased will become a non-fungible token (*NFT, ERC 721, or 1155*) which means it is unique and cannot be forged or duplicated, the **same as physical land in real life**. VUCO World guarantees you exclusive ownership upon purchasing one. Anybody can buy, sell, or rent land at any time, peer-to-peer on the official VUCO World Marketplace, or via OpenSea where the digital land for VUCO World will be minted.

The total is 100,000 Pieces Limited Resource. The VUCOWorld metaverse encompasses 100,000 pieces of land or parcels. **Each parcel is 16 square meters, roughly 50 feet by 50 feet.** So, the land is a limited resource in VUCO World as it is in the real world. Building in VUCO World can be done in two ways: One is using the VUCO World new Builder Tool Set that will be easy to use no skill required menu. The other is through Purchasing Prefabricated buildings and homes inside VUCO World prefabricated sites or from other outside builders who already have ready-made hundreds of different designs ready to be erected on VUCO World Digital Land sites.

In the metaverse of VucoWorld after you buy parcels of digital land, or develop them, you will be able to flip them for a tidy profit. Besides for entrepreneurs or business owners, there are multiple other ways to make money from Purchasing digital real estate in VucoWorld as real money can be made. The land parcels are represented by their own NFT. Exactly like a parallel universe, as VUCO World metaverse blends both the physical and digital worlds. Simply speaking, it's like a shared virtual world in which anything that exists, in reality, is also possible in the VucoWorld.

VUCO
W O R L D

Vuco World White Paper

Users can shop, study, meet with friends, go to concerts and galleries, and even do business. All users need to have to enter the space are their avatars which you will create for free by connecting your Meta Mask wallet on set up. The key thing about VucoWorld metaverse release is decentralization. VucoWorld virtual world will be built on a blockchain, particularly on Ethereum. This means the smart contracts are governed mostly by **DAOs**, not by any central authority. Autonomous worlds use cryptocurrencies to run the VucoWorld economies.

VucoWorld will make available 100,000 properties in different districts in the world. The best place to buy land in VucoWorld would be in the diamond district located in Nova, Aurora, Alden, and Easton. In VucoWorld there are 25 districts. The districts in VucoWorld are Diamond, Platinum, Gold, Silver, Bronze, Emerald, Ruby, Kashmir, Pearl, Greenland, Opal, Vuco Island, Eridu, Uruk, Jericho, Augustine, Isle of Skye, Canaimia, pitons, Kirstenbosch, Telluride, Atlantis, Pink lakes, Algarve, and Sarakiniko.

Pre-Launch PRICE per city are as follows:

DIAMOND
CITIES: Nova, Aurora, Alden, and Easton
Price: Start at $1m,
Size per parcel 32X32 pixel
Add-Ons: 16x16 Pixel for $225k

PLATINUM
CITIES: Kerry, Cape Vuco, Bora Bora, Havana
Price: Start at $137.5k,
Size per parcel 16x16 pixel

GOLD
CITIES: Sirius, Chanel, Dominique, Bali
Price: Start at $125k,
Size per parcel 16x16 pixel

SILVER
CITIES: Victoria, Margot, Adriana, Soraya
Price: Start at $100k,
Size per parcel 16x16 pixel

BRONZE
CITIES: Amara, Blakely, Dior, Lucia
Price: Start at $87.5k,
Size per parcel 16x16 pixel

EMERALD
CITIES: Nylah, Phoenix, Ryleigh, Zara
Price: Start at $75k,
Size per parcel 16x16 pixel

RUBY
CITIES: Sienna, Parker, Millie, Luna
Price: Start at $75k,
Size per parcel 16x16 pixel

KASHMIR
CITIES: Turpan, Vuco Creek, Mitribah, Bandar
Price: Start at $75k,
Size per parcel 16x16 pixel

PEARL
CITIES: Aziziya, Lut, Sahara, Sonoran
Price: Start at $75k,
Size per parcel 16x16 pixel

GREENLAND
CITIES: Amazon, Palymyra, Burkina, Tuvalu
Price: Start at $75k,
Size per parcel 32X32 pixel

OPAL
CITIES: Fuji, Vostok, Amundsen, Yukon,
Price: Start at $75k,
Size per parcel 16x16 pixel

VUCO ISLAND
CITIES: Eureka, Galapagos, Milos, Vincent
Price: Start at $50k,
Size per parcel 16x16 pixel

ERIDU
CITIES: Samui, Harbor, Aruba, Palawan
Price: Start at $50k,
Size per parcel 16x16 pixel

URUK
CITIES: Mallorca, Azores, Capri, Ecuador
Price: Start at $50k,
Size per parcel 16X16 pixel

JERICHO
CITIES: Nile, Congo, Ganges, Volga
Price: Start at $25k,
Size per parcel 16X16 pixel

AUGUSTINE
CITIES: Thames, Laguna, Tahoe, Huron
Price: Start at $25k,
Size per parcel 16X16 pixel

ISLE OF SKYE
CITIES: Stromboli, Yasur, Pacaya, Griffen
Price: Start at $25k,
Size per parcel 16X16 pixel

CANAIMIA
CITIES: Wyatt, Xavier, Zane, Chantria
Price: Start at $25k,
Size per parcel 16X16 pixel

PITONS
CITIES: Acadia, Capital, Bryce, Everglades
Price: Start at $25k,
Size per parcel 16X16 pixel

KIRSTENBOSCH
CITIES: Glacier, Royale, Katmai, Joshua
Price: Start at $15k,
Size per parcel 16X16 pixel

TELLURIDE
CITIES: Kobuk, Lassen, Mammoth, Redwood
Price: Start at $15k,
Size per parcel 16X16 pixel

ATLANTIS
CITIES: Saguaro, Zion, Balboa, Centennial
Price: Start at $10k,
Size per parcel 16X16 pixel

PINK LAKES
CITIES: Millennium, Namba, Brockwell, Lodmoor
Price: Start at $10k,
Size per parcel 16X16 pixel

ALGARVE
CITIES: Beechwood, Voyageurs, Jardin, Beihai
Price: Start at $10k,
Size per parcel 16X16 pixel

SARAKINIKO
CITIES: Flemington, Saratoge, Eclipse, Arrogate
Price: Start at $10k,
Size per parcel 16X16 pixel

VUCO
WORLD

Vuco World White Paper

Only VucoCoin Holders can buy land who have registered at www.vucoworld.com, in addition, their VucoCoin must have a free trading status and the VucoCoin must already be available in their wallets starting December 30th, 2021. No other purchases can be made with any other Cryptocurrency until the new landowners have received their minted NFT digital land deed pictures and smart contract title deeds in their digital wallets. The digital NFT will be created and delivered using Opensea. Once the minted land deed NFT digital ERC1155 has been received by the new landowners. Ethereum will be the only other accepted coin where new buyers can either bid to buy land or buy land at an agreed price by sellers who own and control land inside VucoWorld. In VucoWorld there is a fully subscribed value and price when all land has been purchased in each district. See the Fully described cash price in Value when all land parcels are fully Subscribed in each district starting with the Diamond District. Each District will contain 4 cities In each of the city's 1,024 digital Land parcels in each city totaling 4,096 parcels of land in each district. The Diamond district only sells plot sizes starting with a minimum land purchase of 32×32 land parcels. However, the map in every district is calculated at 16×16 per land parcel at its lowest price and smallest parcels of land. VucoWorld freehold will retain 30% of the total parcels for city roads, bridges, and trees. VucoWorld New Landowners will purchase a maximum of 40% of the total parcels in each city VucoWorld will remain owners of and retain 30% of digital land.

The allocation of plots and assets for each District is described below.

Vuco World Worth	($5,983,880,000)
Roads and Infrastructure @30%	($1,795,164,000)
City Property @30%	($1,795,164,000)
Plots for Sale @40%	($2,393,552,000)

AVATAR EXAMPLES

An AVATAR is an in-game vocal representation of a player, which may be modified piece by piece by the user. An avatar has creation specifications and the format comes with a default set of animations such as walking, running, jumping, fighting, etc. The avatars can be modified piece by piece by using VUCO to purchase unique, funky, and Gucci drip wear within the marketplace.

VUCO
WORLD

VUCOWORLD REVENUE STREAMS

- **LAND SALES -** Digital land is in high demand, in what is already a highly lucrative market as the past week's nonfungible token (NFT) and Metaverse sales figures revealed. Data from industry metrics platform NonFungible.com indicates that there has been more than $300 million in NFT sales over the past week. Of that total, almost a quarter has been for digital land. A patch of virtual real estate in the online world sold for a record $2.4 million worth of cryptocurrency. 50% locked up for 12 months, then being sold in auction sales and proceeds will go to the company's treasury.

- NFT **SALES -** The non-fungible token (NFT) market has exploded this year into a $27 billion segment of the crypto market according to a new report from Chainalysis, which underscored what separates the most profitable digital collectors from the rest. NFTs are a family of crypto assets that hold ownership of unique data linked to a blockchain — most often Ethereum (ETH-USD). They can be packaged as digital collectibles, works of art, music, video game items, real estate of virtual reality platforms like VucoWorld, and even concert tickets. 25 % of NFT sales will be transferred to the company reserve with a lock-up period of 6 months.

- VIRTUAL RENTAL PROPERTIES - VucoWorld will sell 40% of its Metaverse and developers can sell their virtual land parcels as a blank space. Meaning, that owners have full creativity to build whatever they want: be it a hotel, an art gallery, a casino, a cinema, or a sports stadium, Horse tracks, racetracks, or even amusement parks ext. It's the new digital landowner's choice of what to build and how to charge users. The opportunities to generate revenue are endless, from renting a building to charging admission fees or selling advertising space. Not to mention the fact that the virtual property itself could be an investment, the value of which might grow over time.

- ADVERTISING – Owning billboards in prime districts could generate some of the wealthiest users within VUCOWORLD to your place. Of businesses, as well as a passive income opportunity for either renting out the billboards ad space or a complete sale of that billboard on OPENSEA marketplace.

VUCO
WORLD

Vuco World White Paper

There are a total of 500 billboards that will be placed in prime locations all around VUCOWORLD, some will be located in the wealthiest of districts and some will be in the not so prestigious districts of the world. The order below starts from the most prestigious billboard to the least in order from left to right:

#1 Diamond, #2 Platinum, #3 GOLD, #4 Silver, #5 Bronze
https://opensea.io/collection/vucoworld-billboards

25 % of the sales will go to a staking pool as rewards for VUCO TOKEN holders, the remaining 75% will be allocated to the foundation.

MARKET OVERVIEW

New York, US, Dec. 14, 2021, Morgan Stanley envisions the Metaverse as an $8 trillion potential market that will likely become the "next-generation social networking, streaming, and gaming virtual reality platform."

https://vuuzletvph.com/8-trillion-addressable-market-a-look-into-vuco-worlds-potential/

In 2020, the virtual reality gaming industry was valued at USD 6.26 billion. In the period 2021-2028, the market is expected to increase at a CAGR of 31.4 percent, from USD 7.92 billion in 2021 to USD 53.44 billion in 2028.

Eminent Industry Players Profiled in Metaverse Market Are:
- **VUCOWORLD**
- Facebook, Inc
- Tencent Holdings Ltd
- ByteDance Ltd
- NetEase Inc
- Nvidia Corporation
- Epic Games, Inc
- Roblo Corporation
- Unity Technologies, Inc
- Lilith games
- Nextech AR solution corp.
- Decentraland
- Sandbox

VUCOCOIN INITIAL PRIVATE OFFERING FOR ACCREDITED INVESTORS
VUCOCOIN is a holding company that holds the assets for the consortium. Shareholders will receive VUCOCOIN/ special tokens for future trading on CRYPTO CAP TRADES, www.cryptocaptrades.com. Special tokens will allow the purchase of ERC1155 special digital land in VUCO WORLD. Tokens received have been created with smart contracts on the blockchain under ERC20. VUCOCOIN will begin trading when UNISWAP has been connected to our license.
VUCOCOIN is aiming to raise around $137,500, 000 USD with the sale to private accredited investors of 25 million VUCO tokens.
Offering price: $5.50 per token
FLOAT: 2 Billion

TOTAL VUCO TOKENS	2 BILLION	RATE	TOTAL AQUIRED TOKENS
VUCO PIONEER SHAREHOLDERS	50M SHARES	$5.5	50M VUCO TOKENS
ANGEL AND INSIDERS	120M SHARES	$5.5	120M VUCO TOKENS
FOR PRE SELLING	25M VUCO TOKENS	$5.5	25M VUCO TOKENS
FINTECH LICENSE			ONCE FINTECH LICENSE IS ISSUED, TOKENS WILL BE RELEASED TO MARKET
NON AUTHORIZED TOKENS	1.805B	TOTAL	195M VUCO TOKENS
			25M TO BE AQUIRED AT $10
EXTIMATED LAUNCHING TOKEN PRICE $10			**AVAILABLE TOKENS: 2B -195M = 1.805B** **CURRENT MARKET CAPACITY = 2B X $5.50 = $11B**

IN DEPTH ANALYSIS OF CURRENT MARKET CAPACITY OF VUCO TOKENS
As of December 1, 2021, the current rate for 1 VUCO token is $5.50. The maximum supply of VUCO TOKENS is 2 Billion, This gives VUCO market capacity of $11 Billion. Currently VUCO has already issued approximately 50 million acquired tokens to its pioneer shareholders, valued at $275M at the rate of $5.50 per token. 80% of these holdings will be held for a year, 20% can be sold.
The insiders and angel investors of the company own and control approximately 120 million tokens valued at $660M, this is at the rate of $5.50 per token.
VUCO intends to sale 25 million tokens at $5.50 per token.
Allocations of funds:
• 	Grow the development team and infrastructure for VUCOWORLD – 45%
• 	Marketing – creators acquisition and IP licenses for NFT developments – 45%
• 	Security, legal and compliance expenses – 7%
• 	General and Administrative Expenses – 3%
Investors for VUCOCOIN include, but are not limited to:
• 	Accredited investors
• 	Cryptocurrency Investors
• 	NFT owners and creators
• 	METAVERSE investors

VUCO
W O R L D

TECHNOLOGY

Blockchain technology is used to record ownership of tokens and allow owners to transfer/sell/use them without restriction. IPFS is used to store the actual digital asset and ensure the asset cannot be changed without owner permission.

Three different blockchain protocols will be integrated into The VUCOWORLD stack:

- **ERC-20** for VUCO**;** and
- **ERC-1155 and ERC-721** for the Digital Assets storage and trading**.**

FUTURE TECHNOLOGY INTEGRATIONS

Why are we using Ethereum? We found many benefits to do so as detailed below:

- **Ease of use**: Ethereum has been built with flexibility in mind, which perfectly fits our use case with Asset tokens. Ethereum also has the largest number of developers, which allows for well-established standards, best practices and support;
- **Robustness**: It is, as of today, among the most robust blockchain protocols: its wide adoption makes the network validated by many and thus more secure; and
- **Interoperability**: Ethereum is a protocol, a base layer on top of which all applications can build and interact with each other.

The main issue faced by Ethereum today is often said to be its scaling issue. Blockchains are based on three pillars: Security, Decentralization and Scalability (throughput). Historically, Ethereum always put security and decentralization first, at the cost of scalability and some technological improvements need to be made at the base layer to support traffic at scale. On most public blockchains like Ethereum, this is one of the main current concerns, and lots of efforts are in progress to solve those scaling issues, without sacrificing the blockchain trilemma.

Ethereum is a blockchain that has been proven by thousands of Apps and developers for its robustness and offering a large ecosystem, resources and support from developers.

MULTIPLE CLASS FIUNGIBLE TOKEN

At VUCOWORLD, we spend a lot of time looking at how to preserve security and integrity for ASSETS on the blockchain while still allowing the speed and flexibility that users and creators demand. As with many aspects of VIRTUAL WORLD design, you can't get everything you want easily, so it's a matter of balancing elements to implement the best solution

The ERC-1155 standard was designed to support the management of millions of tokens. On top of that our ASSET contract is also ERC-721 compliant and allows multiple unique items to be created by a single smart contract with the benefit of keeping the ERC-721 interface to allow interoperability with other Marketplaces and games

VUCO
WORLD

Vuco World White Paper

In The VUCOWORLD, users will have full control over their ASSETS, by being able to create them, but also have the possibility to buy, sell, and trade those same ASSETS in The VUCOWORLD Marketplace using our VUCO token currency.
INTEROPERABILITY
As we use Ethereum as the substrate of our ERC-1155/ERC721 implementation, any platform/wallet that supports ERC-1155/ERC-721 will be able to inspect and use our ASSET. This means independent developers could rely on the plethora of ASSETS our players will be creating.
The Sandbox gaming environment will be divided into 2 types of tokens:
- VUCO (our VIRTUAL WORLD currency used across the system)
- LAND
- MARKETPLACE
VUCO – ERC20
LAND – ERC721
MARKETPLACE/AVATARS/REAL ESTATE ETC – ERC1155/ERC721
Tokens contracts are responsible for:
- Keeping track of the creator (the address used to mint the token)
- Ownership
- Transfers
- Emitting events when the state changes

WALLETS
We minimize the security risk on our backend by reducing the responsibility of hot wallets that are only used for referral and whitelisting.
The other wallets are cold storage wallets that hold responsibility for updating the platform with new contracts and new parameters. These could later be part of a governance mechanism.
For these cold wallets, we use a 2 out of 3 multi-signature wallet (https://github.com/gnosis/MultiSigWallet) and all of the owners of those multi-signatures are three hardware wallets.
This wallet has the possibility to upgrade our VUCO token, as well as the ability to extend functionality via super operators.
In relation to the methods of payment, if the user wishes to pay with:
- an ERC-20 based token (ETH or DAI), it will then be processed by a smart contract on-chain and the user shall receive the VUCO directly into his wallet; and/or
- BTC, credit card or fiat payment, it will then be processed by a third party service merchant solution, whereby upon confirmation by the latter, the VUCO shall be released.

VUCO
WORLD

Vuco World White Paper

SECURITY

The VUCOWORLD marketplace is relying on the security of Ethereum for the functioning of its smart contracts. The only wallet that can affect the logic of our smart contract is our multi-signature wallet which uses the gnosis MultiSig wallet backed with three hardware wallets.

On our backend side, we manage a database that caches the smart contract events to keep track of ownership. Our backend also stores temporary assets. On that side, its responsibility is thus minimal.

As for fiat payment hot wallet, we are designing a daily auto-refill to ensure that only a minimum amount of token is present, minimizing the consequence of a breach.
